

## 808 Renewable Energy is Moving Fast on Additional New Models

**Bradenton, Florida** – July 16th, 2021 – 808 Renewable Energy Corporation (“808” or the “Company”, OTC : **RNWR** ), today releases additional photos of its first entry-level electric trike vehicle “ Orca Roadster “, which it is a product of international cooperation and supply chain program and will be rolling out to hit the North America market in Q-4 this year, along with a photo of its 2<sup>nd</sup> roadster model and additional new models to be followed for the next two years.

According to Mr. Peter Chen, CFO of the company, “ our second convertible roadster is getting its 3-D scanning done for the mold production at the moment, it is also a 100% plug-in pure electric reverse trike as our first model – Orca Roadster. We are testing a new, bigger and more powerful electric power-train system which is about three times more powerful than the first system on the Orca Roadster, we are very excited about this new development. We believe this will be a very strong and competitive product to challenge the market leader “ Slingshot “ from Polaris ( Ticker : PII ), and our price will be extremely affordable and competitive, therefore we will create a unprecedented market demand once it rolls out into the market. We are working on becoming the electric fun and recreational Tesla in our reverse-trike industry, and we are quite confident in achieving this goal with the international supply-chain network which we have built.

4000 watt electric motor / 4 Speed + N + R

808 Renewable Energy is now putting together a very aggressive marketing campaign for an official launch of its Orca Roadster in Q-4, a team of marketing professionals with Master and MBA degrees has been recruited to handle this exciting project. A very aggressive Christmas Shopping Season campaign is being worked on at the moment to have our products appear on all major e-Commerce platforms in the country.

## SilverLight will roll out six different models over the next two years ( 2022-2024 )
